**OPLINK SECURITY ANNOUNCES THE INDUSTRY'S MOST ADVANCED FAMILY OF CLOUD-BASED, HOME SECURITY SOLUTIONS AT CES 2014**

**CES 2014 Las Vegas, NV - January 6, 2014** – [OplinkSecurity](#), an innovator in smart cloud-based, easy to install, easy to use, lowest cost, broadband home security solutions, today announced the addition of three new solutions to the company's integrated alarm and alerts platform - CareShield™, VideoShield™, and FireShield™.

The company's existing intrusion alert solution, TripleShield™, is the industry's first self-configurable, fully integrated broadband video alarm solution. CareShield, VideoShield, and FireShield expand the company's reach into the in-home care, video surveillance and fire safety categories.

"Like our TripleShield solution, these new solutions feature multi-tier, multi-user, multi-location capabilities and our proprietary Plug-Activate-N-Play™ self-configuring technology that requires no pairing," said Joe Liu, CEO of Oplink. "Our cloud is the smartest and most secure in the industry, and we have created a disruptive market opportunity for major retailers with an easy-to-use, affordable, in-a-box, home and business security solution for their store shelves."

All OplinkSecurity solutions require no pairing or IP configuration to set up, and provide smartphone-centric security video alarm, alert and real-time video monitoring services for home and business owners at a fraction of the cost of incumbent service providers.

**CareShield** provides video monitoring and emergency alert notifications for those who wish to keep connected to loved ones at home while they are away.

**VideoShield** provides video surveillance and alert notifications to families and businesses that desire the assurance that real-time video monitoring provides.

**FireShield** provides smoke alarm alerts and heat sensing notifications in case of a fire at a home or business.

Demonstrations of all OplinkSecurity solutions are available at CES 2014 at the Las Vegas Convention Center South Hall booth #21651. For more information, or to purchase products, please visit [OplinkSecurity.com](#), or call 1-844-OPLINK-S.

## **About OplinkSecurity**

OplinkSecurity, a division of Oplink Communications, Inc. (Nasdaq: OPLK), is a leader in affordable, smartphone-controlled security systems for homes and small businesses. The company's ultra-simple, wireless security solutions use proprietary plug-and-play technology to eliminate the need for professional installation and are controlled by a smartphone app. All OplinkSecurity solutions leverage the company's Smart & Secure Cloud Technology, which enables multi-location monitoring, multi-user, multi-tier authorization, mobile alerts (including recorded video), easy expansion and portability, while protecting the user's personal data and information. OplinkSecurity's affordability, simplicity and ease of use enables everyone to have the peace of mind that comes with staying connected to their home, and the people and things they care about the most.
